Dr. Matthijs Moerkerke

Neuroscientist

Ghent University – Spine, Head and Pain Research Unit, Department of Rehabilitation Sciences
KU Leuven – Center for Developmental Psychiatry, Department of Neurosciences

I am a **postdoctoral researcher at Ghent University** (Belgium) and voluntary research fellow at KU Leuven (Belgium).

My research focuses on **neurophysiology, pain science, and neuroendocrine mechanisms**, with particular interest in the role of **oxytocin**.

I investigate how stress physiology, neuroendocrine signaling, and brain mechanisms interact with behavior and clinical outcomes, combining neuroimaging, physiological recordings, and clinical trial methodologies.

My work aims to translate neurobiological insights into improved diagnostics, treatment strategies, and rehabilitation approaches for neurological and neurodevelopmental conditions.

Education

PhD in Biomedical Sciences (Neuroscience)
KU Leuven - 2022
The role of oxytocin in autism – a randomized clinical trial.
Dissertation link

Postgraduate Studies in Advanced Medical Imaging
KU Leuven - 2017
Postgraduate specialization in advanced medical imaging.

Master of Biomedical Sciences
KU Leuven - 2016
Biomedical sciences training with a strong research orientation.

Research Interests

- Neuroendocrine mechanisms in pain and stress regulation
- Oxytocin ❤
- Neuroimaging (EEG & MRI)
- Physiological and neural biomarkers of chronic pain⚡
- Autism and social cognition
- Brain–body interactions in neurological and neurodevelopmental disorders

Additional Training

- **Research stay – Stanford University, USA (2025)**
  Pediatric Pain Research Laboratory, Prof. Laura Simons
  Supported by Faculty Travel Grant (UGent) and FWO Travel Grant.
- **Research stay – University of Oslo, Norway (2023)**
  Oxytocin research laboratory, Prof. Daniel Quintana
  Supported by FWO Travel Grant.
- **PhD in Neuroscience Certificate (2022)**
- **Oxytocin Conference and Workshop – invited talk (2022)**
  Ettore Majorana Foundation, Erice, Italy
  Supported by FWO Travel Grant.
- **Regulatory Medical Writing Training Programme (2021)**
- **FreeSurfer MRI Analysis Course (2019)**
  Martinos Center for Biomedical Imaging, MIT-Harvard, Boston, USA

Supported by FWO Travel Grant.

- **Good Clinical Practice Certificate (GCP) (2019)**
- **Spanish Language Courses (2017)**
- **MATLAB and Octave Certificate (2017)**
- **Laboratory Animal Science Certificate – FELASA B (2014)**

Teaching & Mentoring

University teaching

- Lecturer for *Neurosciences* (BA Rehabilitation Sciences, Ghent University)
- Lecturer for *Evidence-Based Medicine & Statistics 3* (BA Rehabilitation Sciences, Ghent University) — responsible for theoretical lectures and coordination of practical seminars.
- Leading curricular reform and supervising eight PhD teaching assistants.

Graduate and undergraduate supervision

- Co-promoter of **2 PhD projects**
- Promoter of **25 MSc theses** (Rehabilitation Sciences, Biomedical Sciences and Medicine)
- Co-promoter of **12 MSc theses**
- Daily supervisor of **24 bachelor and master students**
- Jury member for **10 MSc defenses**
- Jury member for **1 PhD defense**

Mentoring

- Mentor for junior researchers in pain science and stress physiology
- Backup ombudsman for the *Postgraduate Studies in Advanced Medical Imaging* programme at KU Leuven (2017–2023)

Scientific Engagement & Outreach

Scientific collaboration & service

- **Steering-group member**, Pain in Motion (PIM) international research consortium — facilitating cross-university scientific exchange and organizing international networking events (2023–present)
  https://paininmotion.be/
- **Expert panel member**, Active Monitoring of Oxytocin Research Evidence (AMORE), University of Oslo — contributing to global consensus-building and open- science initiatives (2025–present)
  https://amore-project.org/
- **Scientific program & award manager**, Pain Science in Motion Conference 2026 — responsible for program development, international communications, and global participant engagement (2025–present)
  https://www.painscienceinmotion.com/
- **Ad hoc grant reviewer**, Foundation for Prader-Willi Research (USA) — oxytocin research grant review (2026)

Scientific outreach in mainstream media

- **EOS Wetenschap** — Oxytocin nasal spray may improve social bonding in children with autism
  https://www.eoswetenschap.eu/psyche-brein/oxytocine-neusspray-verbetert-mogelijk-sociale-banden-bij-kinderen-met-autisme
- **ACAMH Podcast** — Oxytocin administration, neural sensitivity and autism
  https://acamhlearn.org/Learning/Oxytocin_Administration_Neural_Sensitivity_and_Autism/a843e835-992f-4982-9cdd-4b30738c4f8f
- **KU Leuven Blog** — De invloed van oxytocine-neusspray op kinderen met autisme
  https://www.kuleuven.be/child-youth/nl/blog/posts/de-invloed-van-oxytocine-neusspray-op-kinderen-met-autisme
- **Pain in Motion Blog** — The role of oxytocin in chronic pain
  https://paininmotion.be/blog/detail/role-oxytocin-chronic-pain

Public science events

- UGent Research Day — jury member for poster presentations (2026)
- Day of Science (Dag van de Wetenschap) — public science outreach (yearly neuroscience workshops since 2017)
- Brain Awareness Week — neuroscience outreach events (2017)
- Child University KU Leuven — workshops for elementary school children (2016-2018)
- Autisme Beurs — public engagement on autism research (2017)

Memberships

- International Association for the Study of Pain (IASP)
- International Society for Autism Research (INSAR)
- Belgian Association for Psychological Sciences (BAPS)
- Leuven Brain Institute (LBI)
- KU Leuven Child & Youth Institute (L-C&Y)

- Leuven Autism Research (LAuRes)
- Alliantieonderzoeksgroep UGent–VUB Motor Mind

Skills & Methods

Languages

●●●●● **Dutch** — C2 (Native)
●●●●● **English** — C1 (Fluent)
●●○○○ **French** — A2 (Basic)
●○○○○ **Spanish** — A1 (Basic)

Medical imaging proficiencies

Scanning, pre-processing and analysis of images taken with **Magnetic Resonance Imaging (MRI)** (functional, structural and diffusion weighted MRI) and **electroencephalography (EEG),** including stress physiology measures (heart rate, respiration rate and skin conductance). Software experience includes SPM12, Letswave 6, CAT12, CONN, Freesurfer.

Statistical skills

Statistical analysis of behavioural, clinical, and neuroimaging datasets using **RStudio, JAMOVI, SPSS, and MATLAB**, including data preprocessing, visualization, regression analyses, mixed-effects modelling, and hypothesis-driven statistical testing.

Programming skills

Programming scripts for fMRI and behavioural experiments in MATLAB and Presentation (Neurobehavioral Systems)

Laboratory skills

Animal experiments, organ dissection, tissue embedding, microscopic evaluation, and histological analysis.

Clinical skills:

Placing infuses, drawing blood, intramuscular and subdermal injections, ECG and EEG recordings, and CPR training.

Awards & Grants

Fulbright Postdoctoral Research Award Nominee (Belgium–USA) 2026
Nominated for a research stay at Stanford University to develop predictive modelling and machine-learning approaches for multimodal physiological data in chronic pain research.

INSAR PhD Dissertation Award 2024
Awarded by the International Society for Autism Research (INSAR), presented at the Annual Meeting in Melbourne, Australia.
https://www.autism-insar.org/page/RecognitionAwards

BCNBP "Belgium's Got Talent" PhD Thesis Prize 2023
Awarded by the Belgian College of Neuropsychopharmacology and Biological Psychiatry (BCNBP) for best PhD thesis.
https://www.bcnbp.org/belgiums-got-talent

Thérèse Vandereecken Prize for Clinical Medicine 2023
Royal Academy of Medicine of Belgium recognising research on oxytocin's neural, biological and behavioural effects in children with autism, awared to Prof. Alaerts (PhD copromotor)

KU Leuven Postdoctoral Research Grant 2023
Postdoctoral Mandate (PDM) awarded to continue doctoral research for one year after PhD defence.

Summary of Presentations at Conferences

- **Moerkerke, M.** The role of oxytocin in modulating pain and its interaction with stress in the context of musculoskeletal pain. *EFIC 2025*, Lyon, France. **(oral talk)**
- **Moerkerke, M.** PhD Dissertation Award Presentation: *The role of oxytocin in autism*. *International Society for Autism Research (INSAR) 2024*, Melbourne, Australia. **(oral talk)**
- **Moerkerke, M., Daniels, N., Tibermont, L., Van der Donck, S., Tang, T., Prinsen, J., ... Boets, B.** (2023). Chronic oxytocin administration does not rescue reduced neural sensitivity towards emotional faces in autism. *NeuroCog 2023*, Brussels, Belgium. **(oral talk)**
- **Moerkerke, M., Daniels, N., Tibermont, L., Van der Donck, S., Tang, T., Prinsen, J., Bamps, A., Debbaut, E., Steyaert, J., Alaerts, K., Boets, B.** (2023). Influence of repeated intranasal oxytocin administration on neural activity during face processing in children with autism. *International Society for Autism Research (INSAR)*, Stockholm, Sweden. **(poster presentation)**
- **Moerkerke, M., Tibermont, L., Van der Donck, S., Daniels, N., Tang, T., Prinsen, J., Steyaert, J., Alaerts, K., Boets, B.** (2022). Can longterm intranasal oxytocin administration rescue reduced neural sensitivity towards emotional faces in autism? *Oxytocin and Vasopressin: From Brain Modulation, to Epigenetic Regulation and Clinical Applications*, Erice, Sicily, Italy. **(invited oral talk)**
- **Moerkerke, M., Daniels, N., Chubar, V., Van der Donck, S., Tang, T., Prinsen, J., Claes, S., Steyaert, J., Alaerts, K., Boets, B.** (2022). Oxytocin system alterations in autism? Assessing endogenous oxytocin levels and OXTR epigenetics throughout a long-term intranasal oxytocin treatment. *Oxytocin and Vasopressin: From Brain Modulation, to Epigenetic Regulation and Clinical Applications*, Erice, Sicily, Italy. **(poster presentation)**

- **Moerkerke, M., Chubar, V., Daniels, N., Van der Donck, S., Tang, T., Tibermont, L., Steyaert, J., Alaerts, K., Boets, B.** (2022). Oxytocin receptor epigenetics in autism spectrum disorders. *KU Leuven Child & Youth Institute*, Leuven, Belgium. **(oral talk)**
- **Moerkerke, M., Tibermont, L., Van der Donck, S., Daniels, N., Steyaert, J., Alaerts, K., Boets, B.** (2021). The effect of oxytocin on reduced neural sensitivity towards emotional faces in autism. *Leuven Brain Institute (LBI)*, KU Leuven, Belgium. **(poster presentation)**
- **Moerkerke, M., Daniels, N., Van der Donck, S., Steyaert, J., Alaerts, K., Boets, B.** (2021). Validating an EEG-based biomarker of socio-communicative impairments in ASD. *International Society for Autism Research (INSAR)*, virtual. **(poster presentation)**
- **Daniels, N., Moerkerke, M., Prinsen, J., Boets, B., Steyaert, J., Alaerts, K.** (2021). Measurement of sympathetically driven autonomic arousal during eye contact in children with and without an autism diagnosis. *International Society for Autism Research (INSAR)*, virtual. **(oral presentation / open access abstract)**
- **Moerkerke, M., Daniels, N., Van der Donck, S., Steyaert, J., Alaerts, K., Boets, B.** (2021). Neurobiological marker and intervention for socio-communicative impairments in autism spectrum disorders. *European Neuropsychopharmacology*, 44(S51–S52). https://doi.org/10.1016/j.euroneuro.2021.01.079 **(poster presentation)**
- **Moerkerke, M., Daniels, N., Stuer-Jespers, A., Steyaert, J., Alaerts, K., Boets, B.** (2018). In search for an innovative neural marker and intervention for socio-communicative difficulties in children with and without autism spectrum disorders. *Understanding the Neuroregulatory Actions of Oxytocin and its Potential Clinical Applications*, Erice, Sicily, Italy. **(poster presentation)**
